

BOEING DISTRIBUTION SERVICES INC. QUALITY POLICY

Quality is embedded in what we do and how we do it. All employees — regardless of level, role, or location—own the quality of their work and are responsible for delivering the value our stakeholders expect. We have a goal of zero defects, including foreign object debris (FOD), and we are committed to meeting process, business, contractual, and regulatory requirements, engaging human factors, while implementing continuous improvement in our processes that are necessary for our customers to succeed.

Management implements and maintains a Quality Management System (QMS) appropriate to the business needs and the products and services produced and delivered. This establishes a framework for setting quality objectives and focuses on opportunities to continually improve the way we do our jobs. This commitment enables the growth and improvement, key to stakeholder success, and is further outlined on the [Total Enterprise Quality website](#). (Ref. Boeing POL-2)

Effective date: September 16th, 2024

Travis Sullivan
VP, Segment & GM

Scott Champlain
BGS Director Commercial and Core
Quality

This policy has been formulated by Boeing Distribution Services Inc. Leadership. The policy is explained and discussed at general orientation training provided to all existing and new employees. The policy is posted in numerous locations throughout the company.
