

ENGINEERING SERVICES & TECHNICAL SUPPORT

Our dedicated engineering team helps reduce your costs and optimize performance.

From sales expertise and on-site design assistance to application engineering, the Boeing Distribution Services Inc. Engineering team can help improve your operation in a variety of ways. We provide alternatives and upgrades to current application tools as well as cost-efficient options for hardware installations.

Boeing Distribution Services also offers platform-specific technical engineering services in which a Boeing Distribution Services team member partners with your design and engineering teams to provide support across platform-wide initiatives. Our range of technical and consultative services include:

- Alternate parts requests
- Fastener recommendation and sourcing
- Training on fastener technical specifications
- Parts standardization
- Bill of Materials reviews
- Cost-reduction initiatives

Contact your Boeing Distribution Services representative to find out more, or contact us at Customer.Questions@BoeingDistribution.com

Lower your costs while increasing operational and logistical readiness:

- Avoid stock-outs
- Mitigate obsolete parts
- Actively plan new products

Boeing Distribution Services can provide recommendations when only part type and parameters are known — and we can help you define new engineered parts and products then locate appropriate suppliers.
